#### **Nov 5, 2018 Enbridge Line 3 Replacement**

Joanne Bradbury assisted by Brian Rohwer and Whitney Thomas, gave a fast paced overview of the construction of the line 3 replacement for Enbridge that is going on in Manitoba now. To begin she reviewed why the line was being replaced. She explained that Enbridge does constant monitoring using “pigs” through the line as well as surface and aerial monitoring to check for corrosion and other sources of potential line failure. As the line ages it becomes evident that the costs of increasingly frequent repair indicate it is more economical to replace a line. With line 3 they found that the tape encasing the line had not been as durable as originally thought when the line was built so replacement, even though the line isn't as old as many, was the best option. She discussed especially the issues of treating landowners well and being very careful to restore their land, making sure the topsoil was returned properly, as well as being very careful to avoid spreading noxious weeds as they travel from site to site.

As anticipated, the presentation was excellent, the presenters were exceptionally pleasant and generous (their happy dollars became a happy quartet of \$50s!!!) so the audience was very appreciative. Interest was certainly very high.
